# Zhenyuan PAN

zp2411@nyu.edu | New York, NY | zhenyuan-pan-personal-web.vercel.app

## EDUCATION

**New York University** | New York, NY — Expected May 2028
M.A. in Economics; Fall 2026 (STEM-designated)

**Hong Kong Baptist University** | Zhuhai, China — Jun 2026
B.B.A. (Honours) in Applied Economics, First Class | GPA: 3.68/4.00 (Top 10%)

## PROFESSIONAL EXPERIENCE

**Shenzhen International Financial Research Association** | Shenzhen, China — Jun 2025 - Sep 2025
*Macro Research Intern*
- Built a China GDP/CPI nowcasting workflow and dashboard from high-frequency activity, price, credit, trade and survey indicators; aligned release calendars and translated mixed-frequency outputs into recurring chart.

**Zhuhai Gaoke Venture Capital Management Co., Ltd.** | Zhuhai, China — Jan 2025
*Investment and Risk Control Intern*
- Evaluated a humanoid-robotics investment target's technology moat, IP position, and regulatory risks using Wind financial data and Tianyancha corporate-registry records, supporting investment screening and risk-control review.

**Yinhua Fund Management Co., Ltd.** | Beijing, China — Jun 2024 - Sep 2024
*Quantitative Analyst Intern, Quantitative Investment Department*
- Replicated and backtested 20+ A-share factor, event-driven, stock-selection, and ETF-rotation strategies in Python and JoinQuant (Chinese quantitative research/backtesting platform); tested rank IC/decay, portfolio returns, trading costs, point-in-time integrity, and Barra exposures to separate persistent signals from market and implementation effects.
- Developed and stress-tested a DPRO + SUE + Dividend Yield long-only strategy versus the CSI 300, generating 20.4% vs. 7.7% annualized return, Jensen's alpha of 0.131; published selected research on JoinQuant (5,000+ views, 200+ clones).

**Sinosafe General Insurance Co., Ltd.** | Shenzhen, China — Jul 2023 - Sep 2023
*Equity Market Analyst Intern, Investment Management Office*
- Covered 80+ Hong Kong-listed companies across consumer, property, financials, and internet; linked financial-statement changes and earnings quality to operating drivers, then applied earnings forecasts, peer comparisons, scenario analysis, and simplified cash-flow models to form company/sector investment theses.
- Authored 30+ fundamental and post-investment monitoring reports, updating earnings outlooks, valuation ranges, and downside cases after results, disclosures, and policy developments to support portfolio thesis updates and risk monitoring.

## RESEARCH EXPERIENCE

**Why Did Bonds Stop Hedging Stocks?** | *Independent Fixed-Income Research* — 2026
Forthcoming in *The Journal of Fixed Income* (Winter 2026)
- Linked weaker Treasury hedging to a post-2021 reversal in equities' real-rate exposure using 2003–2025 daily data.

**Medicare Payment Reform and Dialysis Supply** | *Independent Healthcare Markets Research* — 2026
Under external review at *Journal of Health Economics* (JCR Q1; #1 Journal in Health Economics)
- Exploited Medicare's randomized ETC rollout across hospital referral regions; built a national provider-market panel to estimate how payment reform changed dialysis entry and geographic access. DOI: 10.13140/RG.2.2.32430.88648

**Port Adjustment to Maritime Disruption** | *Independent Supply-Chain Risk Research* — 2025
Under external review at *Transportation Research Part E* (JCR Q1; #4/66)
- Built a 175-port, 3-corridor monthly panel; estimated continuous-intensity DiD/DDD event studies with fixed effects and 200-placebo tests, then presented findings at an international supply-chain conference. DOI: 10.13140/RG.2.2.28490.53447

**Selective Quality in AI Service Markets** | *Independent Industrial Organization Research* — 2026
Under external review at *International Journal of Industrial Organization* (SSCI; SJR Q1)
- Developed a dynamic model showing how expected verification shifts hidden AI compute toward more visible requests, causing public accuracy to overstate delivered quality. DOI: 10.13140/RG.2.2.25720.00000

## SKILLS

**Financial Data & Platforms:** Bloomberg Terminal; Wind; iFinD (Chinese financial data platform); JoinQuant;
**Programming & Analytics:** Python (pandas, statsmodels); Stata; SQL/MySQL; Excel/VBA; LaTeX.
**Languages:** Chinese (native); English (TOEFL iBT 108).
