

ZHENYUAN PAN

zp2411@nyu.edu | +86 153-6161-3909 | New York, NY
M.A. in Economics, NYU GSAS, Fall 2026

PROFESSIONAL SUMMARY

Economics M.A. student at NYU with internship experience spanning equity research, macro nowcasting, venture due diligence, and systematic A-share strategy research. Built China GDP/CPI nowcasts, replicated 20+ factor/event/ETF strategies, and prepared 30+ HK equity/post-investment reports. Research focus: cross-asset dynamics, real-time macro data, panel/event-study econometrics, and factor models for buy-side or sell-side research roles.

EDUCATION

New York University, Graduate School of Arts and Science | New York, NY Expected May 2028
M.A. in Economics (STEM-designated, CIP 45.0603)

Beijing Normal-Hong Kong Baptist University (BNBU) | Zhuhai, China Expected Jun 2026
B.B.A. in Applied Economics | GPA: 3.68/4.00 (Top 10%)

- Relevant coursework: Applied Econometrics, Time Series Analysis, Intermediate Micro/Macroeconomics, Data Analytics for Business, Linear Algebra, Financial Planning & Investment Analysis.
- Honors: First-Class Scholarship (2024); Second-Class Scholarship (2023, 2025), School of Business.

PROFESSIONAL EXPERIENCE

Shenzhen International Financial Research Association | Shenzhen, China Jun 2025 - Sept 2025
Macro Research Intern

- Built a China GDP/CPI nowcasting workflow from high-frequency activity, price, credit, trade, mobility and survey indicators; standardized release calendars and revision trackers for real-time macro signal monitoring.
- Integrated daily/weekly commodity-price, mobility, property-sales, PMI/export-chain, rates, credit-spread and FX series into a layered macro dashboard covering GDP, CPI/PPI, credit impulse and property activity.
- Adapted a Cleveland Fed-style mixed-frequency process to Chinese data and translated nowcast outputs into charts, exhibits and research sections for economic-situation reports.

Zhuhai Gaoke Venture Capital Management Co., Ltd. | Zhuhai, China Jan 2025
Investment and Risk Control Intern

- Conducted pre-investment diligence on a humanoid-robotics target by mapping corporate structure, cap table, shareholders, patents, litigation, supply-chain relationships and repurchase terms using Tianyancha and Wind.
- Built a Qwen/Python extraction workflow that converted fragmented corporate and legal records into comparable risk fields; compiled the risk register, due-diligence pack and equity-repurchase operations guide.

Yinhua Fund Management Co., Ltd. | Beijing, China Jun 2024 - Sept 2024
Quantitative Analyst Intern, Quantitative Investment Department

- Replicated and backtested 20+ A-share factor, event-driven, stock-selection and ETF-rotation strategies with iFinD Quant, JoinQuant and Suntime APIs; selected research reached 5,000+ views and 200+ clones on JoinQuant.
- Developed a DPRO + SUE + Dividend Yield long-only strategy versus CSI 300 (2005-2026: 20.4% vs. 7.7% annualized; Jensen alpha 0.131; IR 1.00) and stress-tested costs, universes and exposure assumptions.
- Tested flagship and prototype strategies under alternative universes/benchmarks, transaction costs/slippage, point-in-time constraints, parameter sensitivity, Barra exposure checks and Fama-MacBeth validation.

Sinosafe General Insurance Co., Ltd. | Shenzhen, China Jul 2023 - Sept 2023
Equity Market Analyst Intern, Investment Management Office

- Reviewed 80+ HK-listed companies across consumer, property, financials and internet; produced 30+ fundamental/post-investment reports linking financial statements, valuation assumptions and operating drivers to thesis updates.
- Monitored disclosures, earnings, policy changes and sentiment to flag portfolio risks, update long-term investment views and identify changes in catalysts, valuation range and downside cases.

RESEARCH EXPERIENCE

Final Year Project | Supervisor: Dr. Yi Xiao, BNBU | Zhuhai, China Sept 2025 - Apr 2026
Port Adjustment and Resilience under Maritime Chokepoint Disruption: Red Sea Shipping Crisis

- Built a 175-port x 3-corridor monthly panel (2019-2024) from IMF PortWatch, UNCTAD PLSCI, IHO basin definitions and route-deviation exposure; benchmarked outcomes against each port's pre-crisis seasonal distribution.
- Estimated continuous-intensity DiD/DDD event studies with port, month and basin-month fixed effects plus port trends; validated results with pre-trend, leave-top-port-out and 200-round placebo checks.

Research Assistant to Prof. Hongru Tan, BNBU-Zhuhai | Zhuhai, China Jun 2024 - Present
Social Capital in Tutoring Networks; AI, Creative-Labor Substitution and Structural Unemployment

- Designed an RCT-DiD field study of trust, reciprocity and cooperation in volunteer tutoring networks using Trust/Public Goods Games, CHFS-adapted questionnaires and a STATA cleaning/panel pipeline.
- Structured the software-copyrighted Liyun Volunteers WeChat mini-program data layer (registration no. 2025SR0949110), turning assignments, service logs, feedback and role-based reports into research-ready field data.
- Supported a DSGE-DMP AI-unemployment model by mapping AI task substitution, labor categories, vacancies, wages and unemployment variables to the planned structural estimation.

Research Assistant to Prof. Youssef Elhaoussine, BNBU | Zhuhai, China Sept 2023 - Aug 2024
Advertising and Intended Family Size: The Influence of Large-Family Portrayals on Fertility Preferences

- Synthesized English-language research on advertising and fertility preferences; developed the theoretical framework and literature review on how large-family portrayals may shape intended family size.

Research Assistant to Prof. Luo Bei, BNBU | Zhuhai, China Dec 2022 - Dec 2023
COVID-19 and Intertemporal Decision-Making: Self-Employment and Durable-Goods Consumption

- Processed 37GB+ of RESSET data; built Python Selenium/BeautifulSoup scrapers and a STATA cleaning, regression and reporting pipeline.

SELECTED RESEARCH PAPERS

- The Treasury Risk Triangle: Decomposed 14 Treasury ETFs/futures into real-rate, inflation-compensation and curve-shape risk axes using Fed data, HAC regressions and Romano-Wolf controls (2007-2025); 26/42 cells survived multiple-testing controls and rank correlations exceeded 0.92 across regimes.
- Why Did Bonds Stop Hedging Stocks?: Estimated equity responses to real-rate, inflation and short-rate news across 23 baskets; attributed roughly 78% of the post-2021 stock-bond correlation shift to real rates and about 21% to inflation repricing.
- Revision-Robust Real-Time Macroeconomic Forecasting: Compared final-data and ALFRED real-time backtests across 32 macro series; built revision-aware penalties and conformal intervals to separate forecasting skill from ex-post data revisions.

AWARDS AND COMPETITIONS

- Poster: "Port Adjustment and Dynamic Resilience under Maritime Chokepoint Disruption," 5th Annual Conference on Port and Shipping Economic Systems Engineering, Zhuhai, Nov 2025.
- 11th National College Student Finance Challenge: Third Prize, National Final; captain and lead researcher for a new-consumption investment thesis with DCF valuation and channel-check fieldwork.
- ETF competitions: Eastmoney live return 29.10% (+18.13 pp vs. CSI 300, top 4.4% nationwide); 3rd National ETF Elite simulated return 9.88% (+12.57 pp, Second Prize, top 0.29%).

SKILLS

Programming & data: STATA (reghdfe, ppmlhdf, event-study, SEM, ivreg2), Python (pandas, statsmodels, linearmodels, Selenium, BeautifulSoup), MySQL/SQL, VBA, LaTeX.

Econometrics & finance: DID/DDD, event studies, PPML, IV, SEM, panel data, time series, factor models, backtesting, valuation, financial statement analysis; Wind, iFinD, Bloomberg, JoinQuant, Suntime, RESSET.

Languages & AI workflows: Chinese (native); English (TOEFL iBT 108); Qwen API, Claude Code, OpenAI/ChatGPT, Cursor for due diligence, research workflows and factor mining.
