EDUCATION

New York University | New York, NY Expected May 2028
Incoming M.A. in Economics; matriculating Fall 2026 (STEM-designated)

Hong Kong Baptist University | Zhuhai, China Jun 2026
B.B.A. in Applied Economics | GPA: 3.68/4.00 (Top 10%) | Scholarships: First-Class (2024); Second-Class (2023, 2025)

PROFESSIONAL EXPERIENCE

Shenzhen International Financial Research Association | Shenzhen, China Jun 2025 - Sep 2025
Macro Research Intern

- Built a China GDP/CPI nowcasting workflow and macro dashboard from high-frequency activity, price, credit, trade, mobility, and property data; translated mixed-frequency outputs into report-ready charts to support real-time monitoring and research reports.

Zhuhai Gaoke Venture Capital Management Co., Ltd. | Zhuhai, China Jan 2025
Investment and Risk Control Intern

- Conducted pre-investment diligence on a humanoid-robotics target using Wind, a Chinese financial/macro database, and Tianyancha, a Chinese corporate-registry database; developed an extraction workflow using Qwen, a large language model, and Python that standardized corporate and legal records into a risk register and due-diligence pack.

Yinhua Fund Management Co., Ltd. | Beijing, China Jun 2024 - Sep 2024
Quantitative Analyst Intern, Quantitative Investment Department

- Replicated and backtested 20+ A-share factor, event-driven, stock-selection, and ETF-rotation strategies; selected research on JoinQuant, a Chinese quantitative research/backtesting platform, generated 5,000+ views and 200+ clones.
- Developed and stress-tested a DPRO + SUE + Dividend Yield strategy versus the CSI 300 (20.4% vs. 7.7% annualized; Jensen's alpha 0.131; IR 1.00) across cost, universe, point-in-time, and factor-exposure assumptions.

Sinosafe General Insurance Co., Ltd. | Shenzhen, China Jul 2023 - Sep 2023
Equity Market Analyst Intern, Investment Management Office

- Analyzed 80+ Hong Kong-listed companies and produced 30+ fundamental/post-investment reports linking financial statements, valuation assumptions, operating drivers, and market disclosures to portfolio thesis and risk updates.

RESEARCH EXPERIENCE

Final Year Project, BNBU | Zhuhai, China Sep 2025 - Apr 2026
Supervisor: Dr. Yi Xiao | Port Adjustment and Resilience under Maritime Chokepoint Disruption: Red Sea Shipping Crisis

- Constructed a 175-port x 3-corridor monthly panel (2019-2024) and estimated continuous-intensity DiD/DDD event studies with port, month, and basin-month fixed effects; validated results with pre-trend, leave-top-port-out, and 200 placebo checks and presented findings at the 5th Annual Conference on Port and Shipping Economic Systems Engineering.

Research Assistant to Prof. Hongru Tan, BNBU | Zhuhai, China Jun 2024 - Present
Social Capital in Tutoring Networks; AI, Creative-Labor Substitution and Structural Unemployment

- Design an RCT-DiD field study of trust and cooperation in volunteer tutoring networks; structure research-ready data from the Liyun Volunteers WeChat mini-program; map AI task substitution into a planned DSGE-DMP model.

Research Assistant to Prof. Luo Bei, BNBU | Zhuhai, China Dec 2022 - Dec 2023
COVID-19 and Intertemporal Decision-Making: Self-Employment and Durable-Goods Consumption

- Processed 37GB+ of RESSET, a Chinese financial/economic database; built Python Selenium/BeautifulSoup scrapers and a Stata cleaning, regression, and reporting pipeline to create analysis-ready data.

SELECTED RESEARCH & AWARDS

- The Treasury Risk Triangle: Decomposed 14 U.S. Treasury ETFs/futures into real-rate, inflation-compensation, and curve-risk axes using Federal Reserve data, HAC regressions, and Romano-Wolf controls; 26 of 42 tests remained significant.
- Led a team to Third Prize in the National Final of the 11th National College Student Finance Challenge; achieved a 29.10% live return in the Eastmoney ETF competition (top 4.4% nationwide).

SKILLS

Programming & data: Stata (reghdfe, ppmlhdfe, ivreg2), Python (pandas, statsmodels), SQL/MySQL, Excel/VBA, LaTeX.

Methods & finance: DiD/DDD, PPML/IV, panel/time-series data, factor models, valuation, financial statement analysis.

Platforms, languages & AI: Bloomberg Terminal; Wind; Tianyancha; iFinD (Chinese financial-data platform); JoinQuant; Suntime (earnings estimates database); RESSET; Chinese (native); English (TOEFL iBT 108); Qwen API, ChatGPT.
